Charges Against Col. Fellews Were Brought By Way of Revenge.

TROUBLE OF LONG STANDING.

It Began Before Election, but Has Only Just Come to the Surface.

The charges brought against District Attorney Fellows have brought to light the fact that there is a fight on between the Good Government Club and the Committee of LXX. Members of the Good Government organization allege that the taken all the credit belonging to and due

The trouble has been brewing since election, but broke out afresh when the Committee announced a short

of the warfare, and the Good Govern-ment organization came to time prompt Its reply was the charges against District-Attorney Fellows, which move was intended as a blow to the LXX.

"It will be war all the way through, now," explained a prominent member of the Good Government Club to-day, "and

I am wishing to wager that the Committee of LKX. will not be in existence a month hence."

The gentleman then proceeded to furnish some inside history of both organizations. The Good Government Club has been in existance for some years, and includes among its members many who were in the old City Reform Organization.

who were in the old City Reform Organization.
At the conference which was held at the Coleman House the first week in September, Gustav Schwab and Herman Ridder quarrelled over Schwab's alleged ambition to run the German Reform Union and the Ottendorfer factorm Union and the Ottendorfer factorm Union and the Schwab's wings were clipped, and that he was completely turned down.
The conference adjourned, with the explicit understanding that nothing more should be done until after the various parties had held their conventions and named committees to another conference.

various parties had held their conventions and named committees to another conference.

Less than a week had passed when Schwab called a meeting in the Madison Square Music Hall, which led to the formation of the Committee of LxX. Then the kicking in the Good Government Club was great. War was declared against Schwab, and by way of purification some fifteen members of the Good Government Club were placed on the Committee. They were Fulton McMahon, W. Harris Roome, J. Augustus Johnson, Julius Steinburger, W. Travers Jerome, Isaac H. Klein, John D. Faure, William J. Schieffelin, Chas. Taber, Mat J. Lissauer, Richard Deeves, L. J. Callanan, A. H. Ely, Louis L. Delafield and Thomas A. Fulton.

This move did not satisfy the members, however, but the older heads counselled that nothing be said or done until after election, as it would have a tendency to injure the anti-Tammany movement.

The matter rested there. As soon as the election was over the Good Government people were considerably stirred up by the Committee of LXX. taking all the credit for the good work done. Still nothing was said until the Committee announced that it would remain in existence.

"We had haid all our plans to go for Fellows," said the member of the Good Government Club, "and you can imagine how we fell when we found the Committee

in existence.

"We had hald all our plans to go for Fellows," said the member of the Good Government Club, "and you can imagine how we felt when we found the Committee stepping in. Why, some of the five of our members who have proferred charges against Fellows are members of the LXX. and were put on at Schwab's solicitation.

"Schwab does not want the Committee to go out of existence, for it means his political death if it does, as since the election he has resigned from the German Reform Union.

"We have members who have had experience in reform matters. There is Mr. Welling, who was instrumental, when with the old City Reform Club, of bringing charges sgainst Excise Commissioners Roch. Fitspatrick and Meakim. The Committee of Seventy is self-constituted, and has no right to existance unless it is to further Mr. Schwab's interest."

NO CHECK TO THE LXX.

Members Say There Is Now Mor Need of a Deputy Prosecutor.

Chairman Larocque, of the LXX.'s bub-Committee, which is endeavoring to have Gov. But No Gold Deals Have Been Reported To-Day.

Rumor that Foreign Bankers May Buy All the Bonds.

It Is Said that They Will Then Sell in Small Lots.

The story that the bankers are to mee and parcel out the subscriptions for the new bonds is revived again this morning, but no verification of this report can be obtained from an authentic scource.

There is a lot of talk of a blunder on

the part of some one, and it is evident that the bankers are all in the dark as to what their neighbors are intending

to what their neighbors are intending to do.

The most generally believed story this morning is that a few of the foreign banking houses, through Drexel, Morgan & Co., will put in a bid for the entire issue, and if successful peddle the bonds out to anyone here who will pay a slight advance over the bid price.

But in connection with this expected action of the foreign houses, it is common belief that a majority of the gold needed for the bonds will come directly out of the Treasury holdings.

Banks are supposed to hold on to their gold in spite of their statements—made mostly for the public's ears—that they will be patriotic and pay out their gold for bonds.

The premium on gold is still reported

for bonds.

The premium on gold is still reported to exist this morning by the money brokers, although there have been no sales so far to-day. The premium of 1-8 a 1-4, which is asked, is considered by the brokers more in the light of a commission for doing the business for would-be gold holders, than as an actual premium.

The New York agency of a large Canadian institution has received from its correspondents at San Francisco 1250,000 in gold within two days, and \$510,000 in gold has been shipped by the Bank of Montreal to its agency in this city for the purpose of subscribing to the new United States Government loan.

A Wall street banking firm, with Kansas and San Francisco connections, is also receiving small parcels of gold from California.

Says They Will Be Bought with Gold from the Treasury. (By Associated Press.)
DENVER, Nov. 2.—Before Senate

DENVER, Nov. 22.—Befere Senator Teller started for Washington he said, regarding the new bond sewe:

"In my opinion, it is foolish to suppose that the issue of bonds tends to keep a large reserve of gold in the Treasury, as the bonds are purchased with gold that has been withdrawn from the Treasury a few days previously. If Mr. Cleveland would address himself to secure the proper amount of revenue to meet Governmental expenses he would be doing something. ernmental expenses he would be don-something.
"I don't believe there is any system of finance that can give general prosperity to the country that does not include the free use of aliver, with gold at the pres-ent ratio of 18 to 1, or at the French ratio of 18 to 1.

Supt Parsons has already explained that the services of the landscape archi-tect depend upon the amount of con-structive work going on, and that when any extensive improvement was con-templated, there was usually an increase in the expenses of experts. It would seem as if a large corps of archi-tects had been engaged in September, from the amount of bills they submitted,

The compensation of the engineer of construction also presents marked and peculiar fluctuations, explained by Supt. Parsons in the same way. For insta Parsons in the same way. For instance, for the eleven days ending May 31, this item in the account is only \$3.22; for fifteen days in June the engineer received \$8.67 but he made it up in July and August with bills of \$155.27 and \$119.30 respectively. He followed this up with one of \$219.83 for September.

In June he sold the Department \$400 worth, while in July 18 there were three separate instalments of sod delivered, for which he charged the city \$300, \$250 and \$100 respectively. This shows a total of \$2,500 for grass sod in theis locality alone is less than a month.

Supt. Parsons says the Sicilian Asphan Company's men are not now employed by the Department in laying asphalt walks in the parks. They are employed by the city directly now. As a matter of fact, they are the same men who were formerly in the employ of the Company.

"We must have skilled workmen for that class of work," he said to an "Evening World" reporter, "and you can only find such men among those who have been brought up to the business in the amphalt trade.

"As a matter of fact, such workmen are very scarce. We have had great difficulty in getting a sufficient number to push along the work as fast as we would like to do."

He admitted, however, that the kettles and implements used in preparing and spreading asphalt were rented from the Sicilian Company, because they had all the facilities, and it would cost the city a great deal to procure a sufficient plant to do the work itself.

So far as the charges that aephalt had been wastefully used by foromen, with the connivance of inspectors who were in the pay of the contractors, he said he did not believe any such frauda as those alleged could have been perpetrated upon the Department.
